

1. Overview of Project Changes:

Due to the inaccurate estimation of the effort involved in developing the project, after the development phase, it was realised that there is scope for including additional features. This led to improving the project's scope. In order to make the application available to a larger user group, it was decided to develop a website that serves as a platform to host the game application. This change in the project required the reorganization of the team and proper division of resources to the work at hand. Hence, the team was divided into two groups- one that would work on the game application and the other team that would work on designing and developing the website. The team handling the development of the website had to put up additional work hours in order to complete the tasks. More information about the team division and reorganization is explained in section 3.

Thus, the scope of the project was increased to enhance the features of the product. To handle this scope creep, changes were made to the project time line and project plan. A minimum number of days were dedicated in gathering the relevant requirements related to the changes.

2. Revised Gantt chart

Based on the feedback received during the control meeting, the team decided to maintain a dynamic Gantt chart. Figure 1 is a screen shot of the revised project time line.

3. Revised Roles and Responsibilities

Prior to the development phase, all team members had the roles as defined in the initial project plan. After the inclusion of additional features, at the end of the development phase, the following division was made:

Group I (Game Application):

Member ID	Member Name	Role
TM001	Quentin Prevost	Test planner
TM002	Łukasz Swiatek	Test Supervisor
TM004	Yuan Zhou	Test executer

TM005	Yanpeng Zhang	Test executer
-------	---------------	---------------

Table 1 Group I roles and responsibilities revised

Group II (Website development):

Member ID	Member Name	Role
TM003	Yiran Zhou	Design supervisor
TM006	Priyanudeep Eada	Development supervisor
TM007	Srinivasu Akkineni	Test planning and execution
TM008	Lavanya Pampana Vinod	Test supervisor
